Profile

I am an aspiring generalist, currently living and moving around North India. I am obsessed with the possibilities and beauty of programming in problem-solving and fortunately what I do for passion and curiosity is my profession too. When not coding, I read books, play the guitar, take my bike to long solo rides and write some pretty bad poetry. More often than not I get lost in the woods or the hills to carve my wanderlust.

Education

Bachelors of Technology Computer Science
Sharda University August 2010 - May 2014

January 2014 - June 2015 Noida, IN

Projects

MKA Desktop App
January 2013 - June 2014 *http://www.getmka.in*
MKA is an application aiming to improve your health related issues caused bysitting in front of computers for long hours via reminders. It is a computer application that in equal intervals reminds you to take proper breaks.

Open Flush Web App
July 2013- September 2014
http://open-flush.vishanlranjan.in
This was a multiplayer card game with real-time transactions.

YessCSS Web App
January 2017 - November 2017
http://www.yesscss.com
I built with this two friends of mine. It is a web app which creates visual designs with easy to user actions and generates the corresponding CSS code for it.

Mean Machine Open Source
January 2015 - Present Personal
I created this open source boilerplate for MEAN stack and distributed it with many out of the box functionalities.
